Jenkins, GitLab, Octoperf,
Bitbucket

Languages

French

(Mother tongue)

English

(Good knowledge)

German

(School level)

Education

Bachelor of science HES-SO in Software engineering

Haute école Arc, Neuchâtel

September 2017 - August 2021

CFC in Computer science with Maturity Certificate

CPLN, Neuchâtel

August 2014 - July 2017

Work experience

Software Engineer

e-novinfo, Marin-Epagnier / Renens

June 2022 - Present

- Added new features and improved performance of a time management web application (frontend and backend).
- Worked on a ticketing system to support our IT department in their daily tasks.
- Increased company's efficiency by maintaining and improving our ERP.
- Provided software support.

Software Engineer Intern

e-novinfo, Marin-Epagnier

November 2021 – January 2022

- Designed and implemented a tool that execute a SQL script on multiple databases.
- Debugged a time management web application (frontend and backend).

Projects

Tennis Couvert des Cadolles

www.tenniscouvertdescadollessa.ch

- Used Symfony, Stimulus, and Turbo to create a showcase website.
- Designed and created a database with MariaDB.
- Maintained the website to ensure it stayed up to date with client's needs.

Bachelor project: YuMi Robot and Grasping

- Researched state of the art in robot grasping using machine learning algorithm.
- Successfully used a machine learning algorithm to grasp random objects with peak precision using a YuMi Robot and Python.

GuideMe

- Designed and implemented backend and frontend of a web application using Laravel and VueJs.

Hobbies

Guitar, Escape games, Reading, Video games, Cooking
